A staggering volume of items of potentially substantial intellectual value are unknown and inaccessible to scholars.

This program addresses this problem by awarding grants for supporting innovative, efficient description of large volumes of material at high value to scholars.

To date, the program has funded:

- the creation of a reported 2,032 finding aids
- the processing of 25,149 linear feet of archival material, plus processing for another 1,442 cubic feet of materials
- the creation of more than 40,000 finding aids
- another 98,485 boxes and more.

Our goal is to prepare and develop the next generation of leaders in libraries, information services, and higher education by engaging those who seek to further develop their skills for the benefit of higher education.
